New Normal Holiday Feast | *Enjoy Al Fresco Dining and Home Party Sets*

Features of the Issue

SPECIAL FEATURE — December marks the start of holiday festivities. Christmas parties and family gatherings are the usual scenarios during this month, but as the world faces a pandemic, celebrating in the new normal calls for adjustments in big festivities that we are used to. In this issue, Philippine Primer presents ways of enjoying holidays at home through party sets that are available for delivery and take out.

If you miss dining out, we also provided a list of restaurants around Makati and BGC with alfresco or outdoor seating for better air circulation and social distancing.

HOW DOES PLASMACLUSTER ION TECHNOLOGY WORK?

1 Plasmacluster Ions are released

Plasmacluster Ions are positive and negative ions-similar to the ones found in nature. The ions are surrounded by water molecules when they are released into air.

2 Plasmacluster Ions attach airborne threats

The ions form highly oxidizing hydroxide radicals when they adhere to the surface of molds and viruses. They physically break down and remove the proteins from suspended microbe surfaces.

3 Ions return to air as water

The hydroxide radicals combine with hydrogen (H) to form water (H₂O) and return to the air, providing moisture.
